

Denise Justice

QA Software Tester/Jr. Software Web Developer

With a strong interest in Quality Testing, coding, and always learning, I bring a solid skill set and varied work experience to software testing. I completed a Full Stack Web Development program with DevPipeline, where I gained experience in front-end and back-end development, business analysis, support, and QA. This hands-on experience gave me a good understanding of software systems, which I'm now using to excel in Quality Testing.

Education & Training

Software Testing 15.5 hours

Jul 2024 - Jul 2024

Udemy at South Jordan, UT

Project-based learning to prepare diverse testing deliverables efficiently. Hands-on experience across the entire software testing project lifecycle provided insights into test analysis, design, implementation, execution, and Agile practices. Interview assignments and instruction in SQL for testers and automation techniques rounded out my comprehensive training.

Full Stack Web Development

Oct 2022 - Aug 2023

DevPipeline at Orem, UT

Built a strong foundation with Python, learning core programming concepts and problem-solving techniques. Advanced to front-end development with JavaScript and React, creating dynamic, responsive user interfaces. Gained knowledge in back-end development with Python, working with MySQL and PostgreSQL databases. Acquired a comprehensive understanding of full-stack development.

Web Development

Mar 2022 - Sep 2022

Salt Lake Community College at West Jordan, UT

HTML, CSS, WordPress, Intro to PHP

Technology Training

Jan 2022 - Mar 2022

Tech-Moms at West Jordan, UT

I completed a comprehensive introductory course that explored various technology fields, providing insights into different career paths. The course covered areas such as software development, cybersecurity, quality assurance, and UI/UX, helping me identify my interests and align them with potential career opportunities.

Bachelor of Science

Oct 2005

DeVry University at Denver, CO

Technical Management

Application Development Projects

Employment history

Jr. Web Developer

Jan 2023 – Mar 2024

DevPipeline at Orem, UT

Collaborated on rotating teams to develop applications, troubleshoot issues, and ensure quality assurance.

Actively involved in sprint planning, backlog grooming, and tracking progress on app development to ensure timely and reliable delivery.

Stay at Home Parent

May 2010 – 2023

SLC, UT

I managed household operations, including scheduling and logistics, which developed my strong organizational and multitasking skills. I coordinated and managed family activities and educational support, and volunteered to manage the memberships for the Moms Club of South Jordan.
